Tell us about your company/organization

Apiculture WB inc. is a craft company specializing in hive based products, such as: honey and wax including apitherapy, consultation, pollen, propolis and bee venom. We differentiate ourselves by planting and maintaining native pollinator flowering plants as well as strategically spreading out our

honeybee colonies as to not over compete with native pollinators. We are also managing our Highland beef on rotating pastures as to regenerate our soils and maintain the bacterial habitat within.

Are you the primary contact person?

Yes

1. Creating Healthy Pollinator Habitat: Describe your plans to create, improve and maintain pollinator habitat.

We have hired an agronome to implement native plants, shrubs and trees on all our properties as to have flowers bloom from May to September.

2. Educating Employees, Customers and the Community: Describe your plans to educate employees, customers and/or community members about the importance of pollinators and healthy habitats.

Through our farm boutique we will have signage that promotes Bee City's message and provoke conversations on the topic.

3. Celebrating Pollinators: Describe your plans to celebrate pollinators during International Pollinator Week (third week of June) or at other times.

We could actively share via our social media platforms during this period.

Please submit a short 50-100 word write-up of why it is important to be a Bee Partner.

WB Gold highly depends on a healthy environment to produce natural and chemical free products which in turn provide health benefits to humans. We therefore adhere to Bee City's mission statement and feel that the organisation and its network can provide us with support as well as an expertise so that we can focus on our operations.
